CHANGE – Handbook for History Learning and Human Rights Education

How does combining history learning and human rights education facilitate the further development of these approaches and the empowerment of learners? And what would such a combination look like in educational practice?

This handbook provides ideas for educators in formal and non-formal education as well as in university level teacher training, incorporating theoretical and practice-oriented perspectives. The Change approach connects the exploration of human rights-related change in the past with the prospect of contributing to change in the present.

ISBN 978-3-7344-0390-3 (Print) ,
